# 7.0 Indicator Logic and Report and Patient List Formats

This chapter defines in detail the logic for the denominator and numerator for each indicator, including the formats for reports and for associated patient lists.

# 7.1 Indicator Report Basics

## 7.1.1 Logic Example

The GPRA indicator example used in section 3.2.2 above was Indicator # 7 Pap Smear Rates: Maintain the proportion of eligible women who have had a pap smear documented within the past three years at the FY 2002 rate.

For GPRA+, the indicator definition becomes:

- Denominator: Females ages 18 through 64, excluding documented history of hysterectomy. (The clinical "owner" of the indicator has determined based on current medical guidelines that "eligible" women are defined as ages 18-64.)
- Numerator: patients with documented pap smear or refusal in past three years; displays refusals separately.

For the programmer, indicator #7 is described in terms of the following logic:

- Begin with the IHS User Population definition (see section 7.1.4) and find the subset of females ages 21 through 64 on the beginning day of the Report period (the difference between the age range 18-64 in the definition and 21-64 in the logic is because the software looks back 3 years for a test when a patient who is currently 21 would have been 18);
- Exclude patients with documented hysterectomy by searching the V Procedure file for procedure codes V45.77, 68.3-68.7 or 68.9 any time before the end of the Report period.
- For this denominator, check for a pap smear in the following ways:
  - 1) V Lab is checked for a lab test called PAP SMEAR.
  - 2) Purpose of Visits are checked for a Diagnosis of V76.2-SCREEN MAL NEOP-CERVIX.
  - 3) Purpose of Visits are checked for a Diagnosis of V72.3 GYNECOLOGIC EXAMINATION.
  - 4) Procedures are checked for a procedure of 91.46.
  - 5) V CPT is checked for the following CPT codes: a) 88141-88150; b) 88152-88158; c) 88164-88167.
  - 6) The Women's Health Tracking package is checked for documentation of a procedure called Pap Smear.

For a detailed description of the logic for each indicator included in GPRA+, see Section 7.2 Logic and Formats by Indicator.

## 7.1.2 GPRA+ Denominator Definitions

The denominator is the total population that is being reviewed for a specific indicator. Traditionally, GPRA indicators have used the standard IHS User Population definition to define the denominator for most GPRA clinical indicators.

#### *IHS User Population* is defined as:

- Indian/Alaskan Natives Only based on Classification of 01 Indian/Alaskan Native. This data item is entered and updated during the patient registration process.
- Must reside in a community specified in the community taxonomy specified by the user.
- Must be alive during the entire time frame.
- Must have been seen at least once in the 3 years prior to the end of the time period, regardless of the clinic type.

In FY 2003, a second denominator was developed specifically for clinical indicators that was felt to be more representative of the active clinical population.

#### Active Clinical population is defined as:

- First three definitions from IHS User Population, and
- Must have *two* visits to medical clinics in the past three years. At least one visit must be to one of the following medical clinics:

| 01 | General           | 24 | Well Child      |
|----|-------------------|----|-----------------|
| 02 | Cardiac           | 28 | Family Practice |
| 06 | Diabetic          | 31 | Hypertension    |
| 10 | GYN               | 70 | Women's Health  |
| 12 | Immunization      | 80 | Urgent          |
| 13 | Internal Medicine | 89 | Evening         |
| 20 | Pediatrics        |    |                 |

The second visit can be EITHER to one of the core medical clinics listed above OR to one of the following medical clinics:

65

| 03 | Chest And TB       | 32 | Postpartum             |
|----|--------------------|----|------------------------|
| 05 | Dermatology        | 37 | Neurology              |
| 07 | ENT                | 38 | Rheumatology           |
| 08 | Family Planning    | 49 | Nephrology             |
| 16 | Obstetrics         | 50 | Chronic Disease        |
| 19 | Orthopedic         | 69 | Endocrinology          |
| 23 | Surgical           | 75 | Urology                |
| 25 | Other              | 81 | Men's Health Screening |
| 26 | High Risk          | 85 | Teen Clinic            |
| 27 | General Preventive | 88 | Sports Medicine        |

GPRA+ uses different denominators depending on the report type (see Section 5.0 Reports and Patient Lists for definitions of the different report types).

| Report Type                    | Denominator Definition  |
|--------------------------------|---|
| Local                          | IHS User Population   |
|                                | Active Clinical population  |
|                                | • Indicator-specific definition (some indicators)                             |
| GPRA Report                    | IHS User Population or indicator-specific definition, if available            |
| Annual Area Performance Report | Active Clinical population or indicator-<br>specific definition, if available |

# 7.1.3 Diabetes-specific Denominators

The Diabetes indicators use two denominator descriptions *in addition* to the User Population and Active Clinical population descriptions detailed in the previous section. Diabetes indicators include 1-6, 15, and A. Additionally indicators 25, 26, 30-1, 30-2, and C-1 use diabetic patients as one of multiple denominators.

For the core Diabetes indicators (1-6), the denominators are defined below. Denominator 3 Active Diabetics has been defined as the denominator used for national GPRA reporting.

**Denominator 1:** All GPRA User Population patients diagnosed with diabetes (250.00-250.93) at least one year prior to end of Report period.

**Denominator 2:** All Active Clinical patients diagnosed with diabetes (250.00-250.93) at least one year prior to end of Report period.

**Denominator 3 (GPRA Indicator):** Active Diabetic patients, defined as all Active Clinical patients diagnosed with diabetes at least one year prior to the Report Period (Denominator 2), AND at least 2 visits in the past year, AND 2 diabetes-related visits ever.

NOTE: Denominator 3 is used as the basis for all other indicators containing a denominator description of diabetic patients.

**Denominator 4 (HEDIS-based Indicator):** Active Adult Diabetic patients, defined by meeting the following criteria: 1) who are 19 or older at the beginning of the Report period, 2) whose first ever DM diagnosis occurred at least one year prior to the end of the Report period; 3) who had at least 2 DM related visits ever, 4) at least one encounter with DM POV in a primary clinic with a primary provider during the year prior to the end of the Report period; and 5) never have had a creatinine value greater than 5.

Denominator 4 uses DM AUDIT CREATINE TAX taxonomy to determine creatinine tests.

The Diabetes Program defines "primary clinic" as the following clinic codes:

| 01 | General           | 20 | Pediatrics      |
|----|-------------------|----|-----------------|
| 06 | Diabetic          | 24 | Well Child      |
| 13 | Internal Medicine | 28 | Family Practice |

# 7.1.4 Age Ranges

For the purposes of GPRA+ reports, the age of a patient is calculated at the beginning of the Report period. E.g., for a Current Report period October 1, 2001 through September 30, 2002, Jane Doe is defined as age 64 if her birth date is October 10, 1936, even though she becomes age 65 during the Report period.

# 7.1.5 Report Cover Page Format

The Cover Page for each report appears in the following format (Figure 7-1 below with key elements described).

- Report Type: the top line of the cover page describes whether the report is Local, GPRA or Area Annual Performance Report.
- **Report Time Periods:** described the Current Report time period, as well as the Previous and Baseline periods. All report periods encompass one year.
- **8** Run Time: records how long this Report took to run. Run time depends on many factors, including RPMS server type and size, number of patients in your RPMS database, and the number of indicators you are running.

- **Denominator Definitions:** describes the definition of the key denominators for the specific report. GPRA Report uses the User Population definition only; the Area Annual Performance report uses the Active Clinical definition. Definitions are provided on each Cover Page so that any user who runs the report will understand the logic.
- **Output File information:** if a user has designated that a delimited file be created, the file name will appear here. For the GPRA and Area Annual Performance reports, the name of the export file will also be shown.
- **6** Communities List: a list of all communities and facilities included in the Community taxonomy (see section 4.1.2) selected for this Report will be displayed.

```
O
              *** IHS FY03 Local Clinical Performance Indictor Report ***
                         Date Report Run: Mar 05, 2003
                          Site where Run: DEMO SITE
                        Report Generated by: LAST, FIRST
                 Reporting Period: Oct 01, 2001 to Sep 30, 2002
     2
                  Previous Year Period: Oct 01, 2000 to Sep 30, 2001
                 Baseline Period: Oct 01, 1998 to Sep 30, 1999
                                 B
RUN TIME (H.M.S): 0.15.33
Denominator Definitions Used in this Report:
GPRA USER POPULATION:
1. Indian/Alaskan Natives Only - based on Classification of 01 - Indian/Alaskan
Native. This data item is entered and updated during the patient registration
process.
2. Must reside in a community specified in the community taxonomy specified by the
user.
3. Must be alive during the entire time frame.
4. Must have been seen at least once in the 3 years prior to the end of the time
period, regardless of the clinic type.
ACTIVE CLINICAL POPULATION:
1. Definitions 1-3 above.
2. Must have 2 visits to medical clinics in the 3 years prior to the end
of the Report period. At least one visit must include: 01 General, 02
Cardiac, 06 Diabetic, 10 GYN, 12 Immunization, 13 Internal Med, 20
Pediatrics, 24 Well Child, 28 Family Practice, 31 Hypertension, 70 Women's
Health, 80 Urgent, 89 Evening. See User Manual for complete description
of medical clinics.
A delimited output file called testlocd
                                                                         6
has been placed in the public directory for your use in Excel or some
other software package.

         The following communities are included in this report:
      0
              FACILITY #1
               FACILITY #2
               FACILITY #3
               FACILITY #4
               SITE, RURAL
               SITE, URBAN
```

Figure 7-1: Report Cover Page Sample

# 7.1.6 Report Summary Format

For each indicator, the GPRA+ reports display the following information for each of the three time periods:

- the count of the number of patients in the denominator;
- the count of the number of patients within that denominator who meet the numerator definition;

- the percentage of the total patients in the denominator who meet the numerator, i.e., [Numerator Count] / [Denominator Count] \* 100; and
- the change from the Current Report period from either of the past time periods, calculated as an absolute value (see **9** below).

The following example of a summary report page (Figure 7-2) shows the key elements.

- Report Date: displays the date that the report was run.
- **Report Type:** the top line of the cover page describes whether the report is Local, GPRA or Area Annual Performance Report
- **8 Report Time Periods:** describes the Current Report time period, as well as the Previous and Baseline periods.
- **4 Indicator Title:** displays the indicator identifier and short title. GPRA indicators are identified as numeric (e.g., 7 Women's Health: Pap Smear); developmental indicators are identified as letters (e.g., B Colorectal Cancer Screening).
- **Denominator Definition(s):** the specific and detailed definitions for each denominator for the individual indicator. Local reports will have 2-4 denominators for most indicators. The Local report will also define which denominator is the GPRA indicator; this denominator only will appear on the GPRA Report.
- **One Numerator Definition(s):** detailed definition of each numerator for the indicator. Some numerator definitions will include specific codes searched for, if the description is not too long.
- Indicator Definition: the general definition for the indicator. GPRA indicator definitions are excerpted directly from the FY03 GPRA Indicator definitions (see Appendix A: FY03 and FY04 GPRA Indicators with JCAHO Crosswalk).
- **Indicator Goal(s):** Details IHS past performance for FY 2001 and/or FY 2002, if any (for GPRA indicators), generally displayed as percent (%). Also displays any performance targets established by IHS for FY 2010 or the Healthy People 2010 target (see Section 3.1.3Comparing Ourselves to National Guidelines).
- **Ourrent Report Period Change from Past Years:** calculates the change in the percent (%) from either the Previous Year or the Baseline Year to the Current Report period. GPRA+ FY03 uses the absolute difference between the first percentage and the second percentage, e.g., [Report Period %] minus [Base Period %] = Change. The direction of the change is indicated by a "+" (plus) or "-" (minus). The "+" indicates that the Current Report percent is larger than the past period.

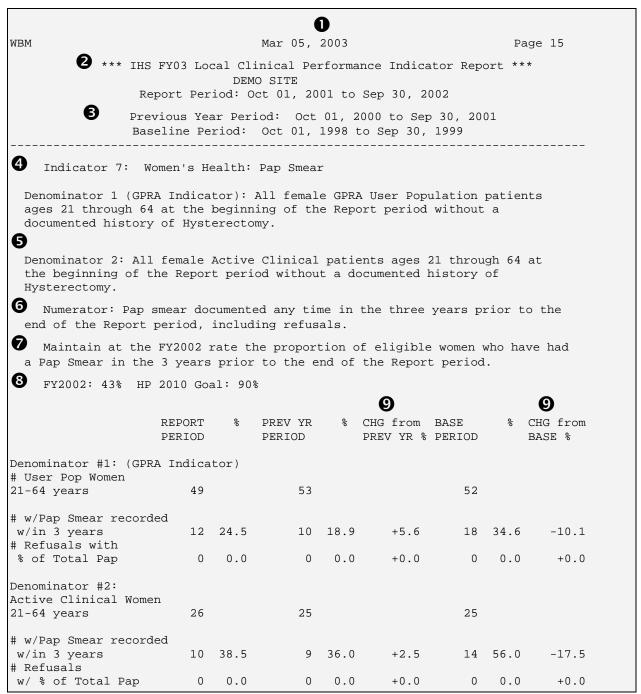

Figure 7-2: Sample Report Summary Page

#### 7.1.7 Patient List Formats

Patient Lists for individual indicators are available with any Local report and display patients who meet the numerator(s), denominator(s) or both, depending on the indicator. Patient list options include a random list (10% of the total list), a list by primary care provider, and the entire patient list that meets the indicator. Users select which indicators they want to run patient lists for after they have selected the

indicators to report on. See section 5.1 Local Report for a detailed description of how to produce patient lists.

Patient Lists are organized by 1) Community; 2) gender; 3) age; and 4) last name.

**NOTE:** To be able to sort and manipulate the patient lists by any column, it is recommended that you select either D Delimited or B Both when you are prompted for the Report format (see section 5.0). By opening the delimited file in Excel, you can sort and format the lists (see *Appendix B section 10.0 Working with Delimited Files*).

Key elements of the Patient List format are described below (Figure 7-3).

- Report Type: indicates "Patient List" as the report type.
- **Patient List Type:** displays whether the Patient List is a "Random List," "List by Provider," or "Entire Patient List," depending on which option the user selected.
- **Solution:** List Description: describes which patients will be included on the list. In the example below, the Patient List contains all patients in either of the two denominators (women ages 21 through 64 at the beginning of the Report period); the identifying number of the denominator the patient belongs to (e.g., "1, 2;" indicates that a patient belongs to denominators #1 and #2); the date that a test meeting the numerator definition was performed, if any; and the test code.

**NOTE:** If an indicator has a denominator definition of All GPRA User Population users, the patient list will NOT include the entire denominator, as many sites may have thousands of patients (and hundreds of pages of patient lists). Only patients meeting the numerator will be displayed on the Patient List. The List Description will describe the list content.

- List Columns: all patient lists contain the following columns of information: patient name displayed as Last, First; the patient's Health Record Number (HRN); the Community name; the patient's gender, e.g., M or F; the patient's age; and denominator and numerator information (see ⑤ below). Patient Lists are organized by 1) Community; 2) gender; 3) age; and 4) last name
- **6** Age Column: displays the age of the patient at the beginning of the Report period.
- **6** Value Column: displays different information about the denominator and numerator, depending on the individual indicator. For most patient lists, displays which denominator the patient is a member of (e.g., "1, 2, 3;"). Displays information about the numerator, such as the date a test was given and the test code, whether a health factor or patient education code was recorded, etc. In the

example below, the value column identifies the appropriate denominator, the date a pap smear was documented, and the test code. If no date and code information is displayed, this patient is counted in the denominator only, not in the numerator.

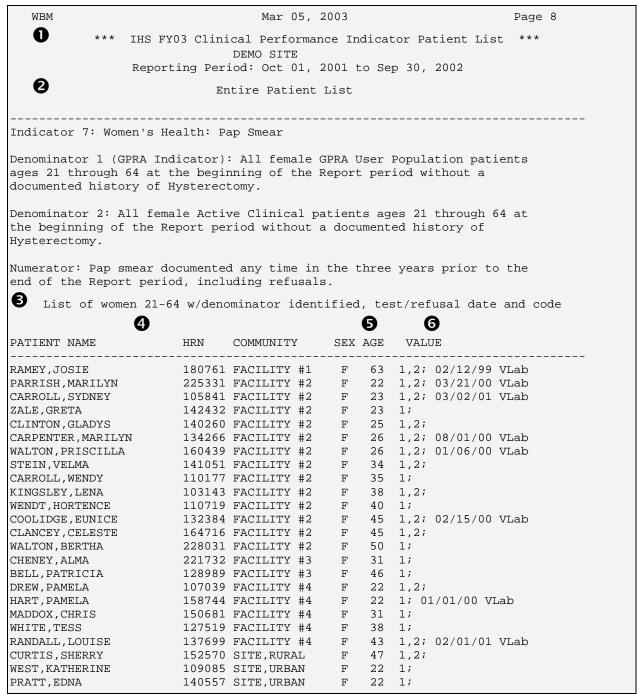

Figure 7-3: Sample Patient List

# 7.2 Logic and Formats by Indicator

This section provides the following information for each indicator:

- Indicator description from the IHS Annual Performance Report to Congress;
- Definitions of each denominator and numerator:
- Detailed description of the logic for the denominator and numerator, including specific codes, fields, taxonomies and/or values searched for.
- Description of which patients and information are contained on the patient list;
- Past IHS performance, if any, and IHS or HP 2010 targets for the indicator;
- Report example; and
- Patient list example.

**NOTE**: GPRA+ FY03 version 2.0 contains all GPRA indicators (1-31) and some developmental indicators (A, B, C-1, C-2, D, and H). The remaining developmental indicators will be available in version 2.1.

**NOTE:** All report examples and patient list examples used in this section were produced from "scrubbed" demo databases and do not represent actual patient data.

## 7.2.1 Indicator 1: Diabetes Prevalence

**GPRA Indicator Description:** During FY 2003, continue tracking (i.e., data collection and analyses) Area age-specific diabetes prevalence rates to identify trends in the age-specific prevalence of diabetes (as a surrogate marker for diabetes incidence) for the AI/AN population.

**Denominator:** All GPRA User Population patients, broken down by gender.

**Numerator 1:** Same as FY02. Anyone diagnosed with Diabetes (at least one diagnosis 250.00-250.93 recorded in the V POV file) *at any time* before the end of the Report period.

**Numerator 2:** Anyone diagnosed with Diabetes in *the year prior* to the end of the Report period.

**Additional Report Features:** The data is broken down further for the following age groups: <15, 15-19, 20-24, 25-34, 35-44, 45-54, 55-64, >64 yrs.

**Patient List Description:** A list of all patients diagnosed with Diabetes (Numerators 1 and 2); the date of the most recent DM diagnosis; and the DM code.

Figure 7-6: Sample Patient List, Indicator 1

## 7.2.2 Indicator 2: Diabetes: Glycemic Control

**GPRA Indicator Description:** During FY 2003, maintain the FY 2002 performance level for glycemic control in the proportion of I/T/U clients with diagnosed diabetes.

**Denominators:** see denominator definitions 1-4 in *section 7.1.3* Diabetes-specific Denominators above. Denominator 3 Active Diabetics is the GPRA indicator.

**Numerator 1:** Number of patients with a Hemoglobin A1C (HgbA1C) documented in the year prior to the end of the Current Report period, regardless of the result.

**Numerator 2 (Glycemic Control):** Patients with HgbA1C less than or equal to (<=) 7 OR with a mean of the last 3 Glucose values less than or equal (<=) to 150.

**Numerator 3:** Patients with HgbA1C equal to or greater than (=>) 9.5 or mean of the last 3 Glucose values equal to or greater than (=>) 225.

**Numerator 4:** Patients with undetermined Hemoglobin A1C or Glucose values. Undetermined is defined as 1) patients with no HgbA1C OR with HgbA1C documented but no value AND 2) less than 3 Glucose values OR documented Glucose without values.

**Logic Description:** GPRA+ searches RPMS for the most recent Hemoglobin A1C test in the year prior to the end of the Report period. If no test is found, GPRA+ searches for the last 3 Glucose values during the same period. If the HgbA1C has a result that equals the term COMMENT, GPRA+ searches for the last 3 Glucose values. Mean glucose value is calculated by adding the last three (3) values and dividing by 3.

**NOTE:** For FY 2004, only Hemoglobin A1C values will be used, not glucose values.

Figure 7-8: Sample Patient List, Indicator 2

## 7.2.3 Indicator 3: Diabetes: Blood Pressure Control

**GPRA Indicator Description:** During FY 2003, maintain the FY 2002 performance level for blood pressure (BP) control in the proportion of I/T/U clients with diagnosed diabetes who have achieved blood pressure control standards.

**Denominators:** see denominator definitions 1-4 in *section 7.1.3* Diabetes-specific Denominators above. Denominator 3 Active Diabetics is the GPRA denominator.

**Numerator 1:** Patients with controlled BP, defined as the mean systolic value is less than or equal to (<=) 130 AND the mean diastolic value is less than or equal to (<=) 80. Both the systolic and diastolic values must meet the criteria

**Numerator 2:** Patients with BP that is not controlled, defined as not meeting the definition of controlled.

**Numerator 3:** Patients with undetermined BP control. Undetermined is defined as less than 2 blood pressures documented in the year prior to the end of the Report period.

**Logic Description:** For each of the 3 numerators, GPRA+ uses the last 3 Blood Pressures documented on non-ER visits in the year prior to the end of the Report period. If 3 BPs are not available, uses mean of last 2 non-ER BPs. The mean Systolic value is calculated by adding the last 3 (or 2) systolic values and dividing by 3 (or 2). The mean Diastolic value is calculated by adding the diastolic values from the last 3 (or 2) blood pressures and dividing by 3 (or 2). If the systolic and diastolic values doe not BOTH meet the criteria for controlled, then the value is considered not controlled.

GPRA+ uses the following definition:

|                                | <b>CPT Codes</b> | LOINC<br>Codes (TBD) | Taxonomy                |
|--------------------------------|------------------|----------------------|-------------------------|
| Creatinine (for Denominator 4) |                  |                      | DM AUDIT CREATININE TAX |

**Patient List Description:** A list of all diabetic patients, with the number of the denominator definition that they meet. Displays the mean blood pressure value, if any, and designates CON for Controlled (Numerator 1) or UNC for Not Controlled (Numerator 2).

Figure 7-10: Sample Patient List, Indicator 3

## 7.2.4 Indicator 4: Diabetes: Dyslipidemia Assessment

**Indicator Description:** During FY 2003, maintain the FY 2002 performance level for the proportion of I/T/U clients with diagnosed diabetes assessed for dyslipidemia (i.e., LDL cholesterol).

**Denominators:** see denominator definitions 1-4 in *section 7.1.3* Diabetes-specific Denominators above. Denominator 3 is the GPRA denominator.

**Numerator 1:** Patients who have had *EITHER* a LIPID PROFILE *OR* an LDL, an HDL and Triglyceride (TG) (all three) in the year prior to the end of the Report period.

**Numerator 2:** Patients with LDL completed in the prior year, regardless of result.

**Numerator 3:** Patients with LDL results of less than or equal to (<=) 100.

**Logic Description:** For each numerator, counts all Y instances reported, regardless of the results of the measurement. For each of the tests described in the numerator, GPRA+ searches for the last test done in the year prior to the end of the Report period.

GPRA+ uses the following to define the tests:

| Test            | CPT Codes    | LOINC       | Taxonomy                   |
|-----------------|--------------|-------------|----------------------------|
|                 |              | Codes (TBD) |                            |
| Creatinine (for |              |             | DM AUDIT CREATININE TAX    |
| Denominator 4)  |              |             |                            |
| Lipid Profile   | 80061        |             | DM AUDIT LIPID PROFILE TAX |
| LDL             | 80061; 83721 |             | DM AUDIT LDL CHOLESTEROL   |
|                 |              |             | TAX                        |
| HDL             | 83718        |             | DM AUDIT HDL TAX           |
| Triglyceride    | 84478        |             | DM AUDIT TRIGLYCERIDE TAX  |

**Patient List Description:** A list of all diabetic patients, with the number of the denominator definition that they meet. The date of any tests described in the numerators, with the LDL value, if any.

| IHS FY 2001 Performance for % of diabetics assessed | 60% |

Figure 7-12: Sample Patient List, Indicator 4

## 7.2.5 Indicator 5: Diabetes: Nephropathy Assessment

**GPRA Indicator Description:** During FY 2003, maintain the proportion of I/T/U clients with diagnosed diabetes assessed for nephropathy.

**Denominators:** see denominator definitions 1-4 in *section 7.1.3* Diabetes-specific Denominators above. Denominator 3 Active Diabetic Patients is the GPRA denominator

**Numerator 1:** Same as FY02. Patients with microalbumunuria test, regardless of result, or positive urine protein test done in year prior to the end of the Report period.

**Logic Description:** GPRA+ searches first for the last microalbumunuria test done in year prior to the end of the Report period, regardless of result (positive or negative). If none are found, searches for last urine protein test with positive (Y) value in same time period.

Positive value for urine protein is defined as:

- First character is a P or p.
- Contains a + sign
- Contains a > symbol
- The numeric value (if the result is a number) is greater than (>) 29

GPRA+ uses the following to define the tests:

| Test             | <b>CPT Codes</b> | LOINC       | Taxonomy                |
|------------------|------------------|-------------|-------------------------|
|                  |                  | Codes (TBD) |                         |
| Creatinine (for  |                  |             | DM AUDIT CREATININE TAX |
| Denominator 4)   |                  |             |                         |
| Microalbumunuria | 82043, 82044     |             | DM AUDIT                |
|                  | ·                |             | MICROALBUMUNURIA TAX    |
| Urine Protein    |                  |             | DM AUDIT URINE PROTEIN  |
|                  |                  |             | TAX                     |

**Patient List Description:** A list of all diabetic patients, with the number of the denominator definition that they meet. The date of any tests described in the numerator, with the value, if any. Microalbumunuria test is indicated by "M;" Urine Protein by "U."

Figure 7-14: Sample Patient List, Indicator 5

## 7.2.6 Indicator 6: Diabetic Retinopathy

**GPRA Indicator Description:** (New GPRA indicator for FY03.) During FY 2003, increase the proportion of I/T/U clients with diagnosed diabetes who receive an annual diabetic retinal examination at designated sites by 3% over the FY 2002 rate.

**NOTE:** The GPRA indicator reported at the national level only applies to three test sites for FY03. This indicator is included here because all sites are expected to report on this indicator beginning in FY05. The numerator is currently defined very broadly for retinal screening.

**Denominators:** see denominator definitions 1-4 in *section 7.1.3* Diabetes-specific Denominators above. Denominator 3 Active Diabetic Patients is the GPRA denominator.

**Numerator 1:** Patients receiving retinal screening in the year prior to the end of the Report period, defined as: diabetic eye exam; or a NON-DNKA visit to an optometrist or ophthalmologist; or a Non-DNKA visit to ophthalmology, optometry, or tele-ophthalmology retinal screening clinics; or a documented refusal of a diabetic eye exam.

**Logic Description:** DM AUDIT CREATININE TAX taxonomy is used for Denominator 4.

| GPRA+ | - searches | in the | follo | wing | order i | or: |

Figure 7-16: Sample Patient List, Indicator 6

# 7.2.7 Indicator 7: Women's Health: Pap Smear

**GPRA Indicator Description:** During FY 2003, maintain the proportion of eligible women who have had a Pap screen within the previous three years at the FY 2002 levels. [For FY 2003, "eligible women" has been defined as ages 18 through 64.]

**Denominator 1:** All females in the GPRA User Population ages 21 through 64 without a documented history of Hysterectomy.

**Denominator 2:** All females in the Active Clinical population ages 21 through 64 without a documented history of Hysterectomy.

**Numerator 1:** All females in the denominator who had a Pap Smear in the three years prior to the end of the Report period. Documented refusals are counted in this numerator.

**Numerator 2** (subset of Numerator 1): Number of patients with documented refusal for pap smear.

**Logic Description:** Age of the patient is calculated at the beginning of the Report period. The difference between the age range 18-64 in the definition and 21-64 in the logic is because GPRA+ looks back 3 years for a test, i.e., when a patient who was 21 at the beginning of the Report period would have been 18.

|              | CPT Codes                   | ICD and Other Codes   |
|--------------|-----------------------------|---|
| Hysterectomy |                             | <b>V Procedure:</b> 68.3 – 68.7 or 68.9                                   |
| Pap Smear    | 88141–88150;                | VLab: PAP SMEAR   |
|              | 88152–88158;<br>88164–88167 | <b>POV:</b> V72.3 - Gynecologic Examination; V76.2-Screen Mal Neop-Cervix |
|              |                             | V Procedure: 91.46  |
|              |                             | Women's Health Tracking: procedure called Pap Smear                       |
| Refusal      |                             | Refusals: Lab Test Value Pap Smear  |

**Patient List Description:** A list of all female patients ages 21 through 64, with the number of the denominator definition that they meet. Displays date of pap smear, if any, and test code or file location.

#### **Indicator Past Performance and Targets:**

| IHS FY 2001 Performance               | 42% |
|---------------------------------------|-----|
| IHS FY 2002 Performance               | 43% |
| IHS 2010 Goal for % of women with pap | 90% |
| smears                                |     |

#### **Performance Improvement Tips:**

- 1. Providers should ask about and record off-site tests (date received and location) on PCC forms. Data entry mnemonic: **HPAP**
- 2. Providers should document refusals; write "Refused" in Pap Order box on PCC form. Data entry mnemonic: *REF* (Lab Test Value, Date Refused).

Figure 7-18: Sample Patient List, Indicator 7

## 7.2.8 Indicator 8: Women's Health: Mammogram

**GPRA Indicator Description:** During FY 2003, maintain mammography screening for eligible women at the FY 2002 rate. [For FY 2003, "eligible women" has been defined as ages 50 through 69.]

**Denominator 1:** All females in the GPRA User Population ages 52 through 69 without a documented history of bilateral mastectomy.

**Denominator 2:** All females in the Active Clinical population ages 52 through 69 without a documented history of bilateral mastectomy.

**Numerator 1:** All females included in the denominator who had a Mammogram documented in the two years prior to the end of the Report period. Documented refusals are counted in this numerator.

**Numerator 2** (subset of Numerator 1): Number of patients with documented refusal of a Mammogram.

**Logic Description:** Age of the patient is calculated at the beginning of the Report period. The difference between the age range 50-69 in the definition and 52-69 in the logic is because GPRA+ looks back 2 years for a procedure, i.e., when a patient who was 52 at the beginning of the Report period would have been 50.

| Mammogram               | VRad or VCPT:<br>76090–76092 | POV: V76.11, V76.12 V Procedure: 87.35 – 87.37 Women's Health: Screening Mammogram, Mammogram Dx Bilat, Mammogram Dx Unilat |

**Patient List Description:** A list of all female patients ages 52 through 69 at the beginning of the Report period, with the number of the denominator definition that they meet. Displays date of mammogram, if any, and procedure code or file location.

## **Indicator Past Performance and Targets:**

| IHS FY 2001 Performance           | 21% |
|-----------------------------------|-----|
| IHS FY 2002 Performance           | 25% |
| IHS 2010 Goal for % of women with | 70% |
| mammogram                         |     |

## **Performance Improvement Tips:**

- 1. Providers should ask about and record off-site mammogram procedures (date received and location) on PCC forms. Data entry mnemonic: *HRAD*.
- 2. Providers should document refusals; write "Refused" in Mammogram Order box on PCC form. Data entry mnemonic: *REF* (Mammogram, Procedure Code, Date Refused).

## 7.2.9 Indicator 13: Oral Health: Access to Dental Services

**Indicator Description:** During FY 2003, maintain the proportion of the AI/AN population that obtain access to dental services at the FY 2002 level.

**Denominator:** Same as FY02. All patients in the GPRA User Population.

**Numerator:** Patients in the denominator who had a dental ADA code 0000 or 0190 documented during the year prior to the end of the Current period.

**Logic Description:** The V Dental file in PCC is searched for an ADA code of 0000 or 0190.

**Patient List Description:** List of patients with documented dental visit only, with date and code.

Figure 7-22: Sample Patient List, Indicator 13

#### 7.2.10 Indicator 14: Oral Health: Dental Sealants

**Indicator Description:** During FY 2003, maintain the number of sealants placed per year in AI/AN children at the FY 2002 level.

**Denominator:** No denominator. This indicator is a total count only, not a percentage.

**Numerator:** The total number of dental sealants (code 1351) during the year prior to the end of the Current Report period. Breakout by the following age groups: <12, 12-18, >18.

**Logic Description:** Age breakouts are based on Healthy People 2010 age groups for dental sealants.

The V Dental file in PCC is searched for any documented ADA code 1351.

**Patient List Description:** Displays list of patients who had sealants and the number of sealants received in the year prior to the end of the Current Report period.

## 7.2.11 Indicator 15: Oral Health: Diabetic Access to Dental Services

**Indicator Definition:** During FY 2003, increase the proportion of the AI/AN population diagnosed with diabetes who obtain access to dental services by 2% over the FY 2002 level.

**Denominator:** Same as Denominator #3 from Diabetes indicators 2-6. Active Diabetic patients, defined as all Active Clinical patients diagnosed with diabetes at least one year prior to the Report Period (Diabetes Denominator 2), AND at least 2 visits in the past year, AND 2 diabetes-related visits ever.

**Numerator:** Patients in the denominator who had a dental ADA code 0000 or 0190 documented during the year prior to the end of the Report period.

**Indicator Logic:** The V Dental file in PCC is searched for an ADA code of 0000 or 0190.

**Patient List Description:** List of Active Diabetic patients and date of dental visit and code, if any.

Figure 7-26: Sample Patient List, Indicator 15.

# 7.2.12 Indicator 23: Public Health Nursing

**Indicator Definition:** During FY 2003, maintain the total number of public health nursing (PHN) services (primary and secondary treatment and preventive services) provided to individuals in all settings and the total number of home visits at the FY 2002 workload levels.

The reports for the PHN indicator count two different types of data: patient data and visit data. The GPRA indicator is based on *visit* data.

#### **Patient Data**

**Denominator 1:** All GPRA User Population patients.

Numerator 1 related to Denominator 1: Patients served by PHNs in any setting.

Numerator 2 related to Denominator 2: Patients served by PHNs in Home setting.

## Visit Data

**Denominator 2 (GPRA Indicator):** Total number of PHN visits in any setting.

**Denominator 3 (GPRA Indicator):** Total number of PHN visits in Home setting.

**Numerator 1:** Neonate (0-28 days);

**Numerator 2:** Infants (29 days - 12 months);

**Numerator 3:** Patients ages 1-64.

Numerator 4: Elders (age 65 and older).

**Logic Description:** A PHN visit is defined as any visit on which the primary or secondary provider has a provider discipline of 13 or 32. Visits in any setting include all PHN visits. Visits in the home setting include any visit with a clinic code of 11 or a location of encounter of HOME; the location used for HOME is entered by the user in the Site Parameters menu option from the System Setup menu (see *section 4.2 Site Parameters*).

**Patient List Description:** List of any patient who has received PHN visit of any type, indicating number of PHN visits in any setting and number of Home visits.

Figure 7-28: Sample Patient List, Indicator 23.

#### 7.2.13 Indicator 25: Adult Immunizations: Influenza

**GPRA Indicator Definition:** In FY 2003, maintain FY 2002 influenza vaccination rates among non-institutionalized adults aged 65 years and older.

**Denominator 1:** All GPRA User Population patients ages 50 or older at the beginning of the time period.

**Denominator 1A** (subset of Denominator 1): All GPRA User Population patients who were ages 50-64 at the beginning of the time period.

**Denominator 1B** (subset of Denominator 1) (GPRA Indicator): All GPRA User Population patients who were ages 65 and older at the beginning of the time period.

**Denominator 2:** All Active Clinical patients ages 50 or older at the beginning of the time period.

**Denominator 2A** (subset of Denominator 1): All Active Clinical patients who were age 50-64 at the beginning of the time period.

**Denominator 2B** (subset of Denominator 1): All Active Clinical patients who were ages 65 and older at the beginning of the time period.

**Denominator 3:** Same as Denominator #3 from Diabetes indicators 2-6. Active Diabetic patients, defined as all Active Clinical patients diagnosed with diabetes at least one year prior to the Report Period (Diabetes Denominator 2), AND at least 2 visits in the past year, AND 2 diabetes-related visits ever.

**Numerator:** Patients in the denominator with Influenza vaccine documented in the year prior to the end of the Report period.

**Logic Description:** Age of the patient is calculated at the beginning of the Report period. Influenza vaccine is defined in the following ways:

| CPT Codes | ICD and Other Codes |
|-----------|---------------------|
|-----------|---------------------|

| Influenza | 90657-90660 | Immunization Code: 88 or 12 (old code) |
|-----------|-------------|--|
| Vaccine   |             | <b>POV:</b> V04.8, V06.6               |
|           |             | ICD Procedure: 99.52                   |

**Patient List Description:** List of Patients ages 50 or older OR with Diabetes diagnosis, with appropriate denominator identified. Displays date of Influenza Vaccine, if any, and corresponding code.

#### **GPRA Indicator Past Performance and Targets:**

| IHS FY 2001 Performance              | 35% |
|--------------------------------------|-----|
| IHS FY 2002 Performance              | 31% |
| HP 2010 Goal for % of patients => 65 | 90% |

#### **Performance Improvement Tips:**

- 1. Providers should ask about and record off-site historical immunizations (IZ type, date received and location) on PCC forms. Data entry mnemonic: *HIM*
- 2. Providers should document refusals; write "Refused" in Influenza Order box on PCC form. Data entry mnemonic: **REF** (Immunization, Value, Date Refused).

Figure 7-30: Sample Patient List, Indicator 25.

#### 7.2.14 Indicator 26: Adult Immunizations: Pneumococcal

**GPRA Indicator Definition** (New for FY03): In FY 2003, maintain the FY 2002 rate for pneumococcal vaccination levels among non-institutionalized adults age 65 years and older.

**Denominator 1:** All GPRA User Population patients ages 65 or older at the beginning of the time period.

**Denominator 2:** All Active Clinical patients ages 65 or older at the beginning of the time period.

**Denominator 3:** Same as Denominator #3 from Diabetes indicators 2-6. Active Diabetic patients, defined as all Active Clinical patients diagnosed with diabetes at least one year prior to the Report Period (Diabetes Denominator 2), AND at least 2 visits in the past year, AND 2 diabetes-related visits ever.

**Numerator:** Patients in the denominator with pneumovax documented *at any time* prior to the end of the Report period.

**Logic Description:** Age of the patient is calculated at the beginning of the Report period. Pneumovax is defined in the following ways:

|           | CPT Codes | ICD and Other Codes  |
|-----------|-----------|--|
| Pneumovax | 90732     | Immunization codes: 33 - Pneumococcal                                      |
|           |           | Polysaccaride Vaccine; 100 – Pneumococcal Conjugate Vaccine; 19 (old code) |
|           |           | <b>POV:</b> V06.6; V03.89, V03.82  |
|           |           | V Procedure: 99.55   |

**Patient List Description:** List of Patients ages 65 or older OR with Diabetes diagnosis, with appropriate denominator identified. Displays date of Pneumovax, if any, and corresponding code.

#### **GPRA Indicator Past Performance and Targets:**

| IHS FY 2002 Performance              | None (new indicator) |
|--------------------------------------|----------------------|
| HP 2010 Goal for % of patients => 65 | 90%                  |

#### **Performance Improvement Tips:**

- 1. Providers should ask about and record off-site historical immunizations (IZ type, date received and location) on PCC forms. Data entry mnemonic: *HIM*
- 2. Providers should document refusals; write "Refused" in Pneumo Vax Order box on PCC form. Data entry mnemonic: *REF* (Immunization, Value, Date Refused).

Figure 7-32: Sample Patient List, Indicator 26

# 7.2.15 Indicator 30-1: Cardiovascular Disease Prevention: Lipids Assessment

**GPRA Indicator Definition:** During FY 2003, the IHS will continue collaboration with NIH to assist three AI/AN communities to implement culturally sensitive community-directed pilot cardiovascular disease prevention programs and initiate expansion into at least one new AI/AN site. (Current sites: the Laguna Pueblo of New Mexico, the Ponca Tribe of Oklahoma, and Bristol Bay, Alaska)

Selected and developed by each local site, consistent with interventions, to be tracked through RPMS:

- \*\* Blood Lipids (% of appropriate patients assessed, % abnormal LDL, TG, HDL; % treated; % at goal) [GPRA+ Indicator 30-1]
- Hypertension (% of adults with HTN, % treated, % at goal) [GPRA+Indicator 30-2]
- Tobacco rates: Using the Health Factors Taxonomy: i.e. documentation and coding on the PCC using the IHS Patient Education Protocols and Codes [GPRA+Indicator H]
- Tobacco Usage Rates [GPRA+ Indicator H]
- Number of Clients in Tobacco cessation programs [GPRA+ Indicator H]
- Number of people who have successfully quit (Quit = not had a cigarette in a year) [GPRA+ Indicator H]
- Obesity rates measured by BMI [GPRA+ Indicator 31]
- Tracking of Patient Education on exercise using the IHS Patient and Family Education Protocols and Codes [GPRA+ Indicator C-1]

**Denominator 1:** All GPRA User Population patients ages 45 and over at the beginning of the Report period who are not diabetic (no diagnosis 250.00-250.93 ever).

**Denominator 2:** All Active Clinical patients ages 45 and over at the beginning of the Report period who are not diabetic (no diagnosis 250.00-250.93 ever).

**Denominator 3:** Based on Denominator #3 from Diabetes indicators 2-6. Active Diabetic patients ages 45 and older, defined as all Active Clinical patients diagnosed with diabetes at least one year prior to the Report Period, AND at least 2 visits in the past year, AND 2 diabetes-related visits ever. Broken out by gender.

**Numerator 1:** Patients who have had *either* a LIPID PROFILE *or* an LDL, an HDL and Triglyceride (TG) (all three) in the five years prior to the end of the Report period.

**Numerator 2:** Patients with LDL less than or equal to (<=) 100.

**Numerator 3:** Patients with LDL between 101-130.

**Numerator 4:** Patients with LDL between 131-160.

**Numerator 5:** Patients with LDL greater than (>) 160.

**Logic Description:** Age of the patient is calculated at the beginning of the Report period. For each numerator, counts all Y instances reported, regardless of the results of the measurement. For each of the tests described in the numerator, GPRA+ searches for the last test done in the five years prior to the end of the Report period.

GPRA+ uses the following to define the tests:

| Test          | CPT Codes    | LOINC       | Taxonomy                   |
|---------------|--------------|-------------|----------------------------|
|               |              | Codes (TBD) |                            |
| Lipid Profile | 80061        |             | DM AUDIT LIPID PROFILE TAX |
| LDL           | 80061; 83721 |             | DM AUDIT LDL CHOLESTEROL   |
|               |              |             | TAX                        |
| HDL           | 83718        |             | DM AUDIT HDL TAX           |
| Triglyceride  | 84478        |             | DM AUDIT TRIGLYCERIDE TAX  |

**Patient List Description:** List of Patients ages 45 or older with appropriate denominator identified. The date of any tests described in the numerators, with the LDL value, if any.

#### **GPRA Indicator Past Performance and Targets:**

| IHS FY 2002 Performance                   | None (new indicator) |
|---|----------------------|
| HP 2010 Goal for % of adults who had      | 80%                  |
| blood cholesterol checked in past 5 years |                      |

Figure 7-34: Sample Patient List, Indicator 30-1

# 7.2.16 Indicator 30-2: Cardiovascular Disease Prevention: Hypertension

**GPRA Indicator Definition:** During FY 2003, the IHS will continue collaboration with NIH to assist three AI/AN communities to implement culturally sensitive community-directed pilot cardiovascular disease prevention programs and initiate expansion into at least one new AI/AN site. (Current sites: the Laguna Pueblo of New Mexico, the Ponca Tribe of Oklahoma, and Bristol Bay, Alaska)

Selected and developed by each local site, consistent with interventions, to be tracked through RPMS:

- Blood Lipids (% of appropriate patients assessed, % abnormal LDL, TG, HDL; % treated; % at goal) [GPRA+ Indicator 30-1]
- \*\* Hypertension (% of adults with HTN, % treated, % at goal) [GPRA+ Indicator 30-2]
- Tobacco rates: Using the Health Factors Taxonomy: i.e. documentation and coding on the PCC using the IHS Patient Education Protocols and Codes [GPRA+ Indicator H]
- Tobacco Usage Rates [GPRA+ Indicator H]
- Number of Clients in Tobacco cessation programs [GPRA+ Indicator H]
- Number of people who have successfully quit (Quit = not had a cigarette in a year) [GPRA+ Indicator H]
- Obesity rates measured by BMI [GPRA+ Indicator 31]
- Tracking of Patient Education on exercise using the IHS Patient and Family Education Protocols and Codes [GPRA+ Indicator C-1]

**Denominator 1:** All GPRA User Population patients ages 45 and older at the beginning of the Report period who are not diabetic (no diagnosis 250.00-250.93 ever). Broken out by gender.

**Denominator 2:** All Active Clinical patients ages 45 and older at the beginning of the Report period who are not diabetic (no diagnosis 250.00-250.93 ever). Broken out by gender.

**Denominator 3:** Based on Denominator #3 from Diabetes indicators 2-6. Active Diabetic patients ages 45 and older, defined as all Active Clinical patients diagnosed with diabetes at least one year prior to the Report Period (Diabetes Denominator 2), AND at least 2 visits in the past year, AND 2 diabetes-related visits ever. Broken out by gender.

**Numerator 1:** Patients with **optimal** Blood Pressure (BP), defined as the mean systolic value is less than or equal to (<=) 130 AND the mean diastolic value is less than or equal to (<=) 80.

**Numerator 2:** Patients with **controlled** Blood Pressure (BP), defined as mean systolic value greater than (>) 130 and less than or equal to (<=) 139 AND mean diastolic value greater than (>) 80 and less than or equal to (<=) 90.

**Numerator 3:** Patients with **uncontrolled** Blood Pressure (BP), defined as mean systolic value greater than (>) 139 and less than or equal to (<=) 159 AND mean diastolic value greater than (>) 90 and less than or equal to (<=) 100.

**Numerator 4:** Patients with **severe uncontrolled** Blood Pressure (BP), defined as mean systolic value greater than (>) 159 AND mean diastolic value greater than (>) 100.

**Numerator 5:** Patients with **undetermined** BP, defined as patients with less than 2 blood pressures documented at non-ER visits in the year prior to the end of the Report period.

**Logic Description:** Age of the patient is calculated at the beginning of the Report period.

For each of the numerators, GPRA+ uses the last 2 Blood Pressures documented on non-ER visits in the year prior to the end of the Report period. The mean Systolic value is calculated by adding the last 2 systolic values and dividing by 2. The mean Diastolic value is calculated by adding the diastolic values from the last 2 blood pressures and dividing by 2. If the systolic and diastolic values do not BOTH meet one of the four categories listed above, then the value that is *least* controlled determines the category.

**Patient List Description:** A list of all patients ages 45 and older, with the number of the denominator definition that they meet. Displays the mean blood pressure value, if any, and designates OPT for Optimal (Numerator 1), CON for Controlled (Numerator 2), UNC for Uncontrolled (Numerator 3), and SUNC for Severe Uncontrolled (Numerator 4).

#### **GPRA Indicator Past Performance and Targets:**

| IHS FY 2002 Performance                | None (new indicator) |
|--|----------------------|
| HP 2010 Goal for % of adults with high | 16%                  |
| blood pressure (140/90)                |                      |

Figure 7-36: Sample Patient List, Indicator 30-2

# 7.2.17 Indicator 31: Obesity

**GPRA Indicator Definition:** During FY 2003, begin implementation or continue implementation all components of the Indian health system obesity prevention and treatment plan developed in FY 2002 that include:

- a. a multidisciplinary stakeholder obesity prevention and treatment planning group
- b. a staff development and IT development plan to assure securing height and weight data for all system users to monitor AI/AN population obesity
- c. an infrastructure to collect, interpret and diffuse the approaches from obesity related demonstration projects and studies to IHS Areas and I/T/Us.

**Proposed GPRA FY04:** Each Area will establish the omission rate of recording the height and weight of its patients (to identify BMI). Each Area will generate a standard age-specific report of BMIs on children and adults.

**Proposed GPRA FY05:** Each Area will decrease the omission rate of recording the height and weight of its patients (to identify BMI) by 10% percent. Each Area will generate a standard age-specific report of BMIs on children and adults.

**Denominator 1:** Same as FY02. All GPRA User Population patients ages 2 through 74 at beginning of Report period. Breakdown each denominator by gender and by the following age groups: 2-5, 6-11, 12-19, 20-24, 25-34, 35-44, 45-54, 55-74.

**Denominator 2:** All Active Clinical patients ages 2 through 74 at beginning of Report period. Breakdown each denominator by gender and by the following age groups: 2-5, 6-11, 12-19, 20-24, 25-34, 35-44, 45-54, 55-74.

**Numerator 1:** Same as FY02. Patients for whom a BMI could be calculated.

**Numerator 2**: For those with a BMI calculated, those considered overweight but not obese using BMI and standard BMI tables.

**Numerator 3:** For those with a BMI calculated, those considered obese using BMI and standard BMI tables.

**Numerator 4:** Total of Numerators 2 and 3, all overweight patients.

**Additional Report Features:** Report pages following the summary break the data down further for the following age groups: 2-5, 6-11, 12-19, 20-24, 25-34, 35-44, 45-54, and 55-74 yrs. Age group breakdowns are based on Healthy People 2010.

**Logic Description:** Age is calculated at the beginning of the Report period. GPRA+ calculates BMI at the time the report is run, using NHANES II. For 18 and under, a height and weight must be taken *on the same day* any time in the year prior to the end of the Report period. For 19 through 50, height and weight must be recorded within the last five years, although not required to be on the same day. For over 50, height

and weight must be recorded within the last two years, not required to be taken on the same day.

Overweight but not obese is defined as BMI of 25 through 29 for adults 19 and older; for ages 2-18, based on standard tables.

Obese is defined as BMI of 30 or more for adults 19 and older; for ages 2-18, based on standard tables.

**Patient List Description:** List of patients for whom a BMI can NOT be calculated, with appropriate denominator defined.

**Indicator Targets: TBD**

Figure 7-39: Sample Indicator 29

#### 7.2.18 Indicator A: Diabetes and Mental Health

**Indicator Description:** Determine the proportion of diabetic patients with a diagnosis of depressive disorders.

**Denominator:** Same as Denominator #3 from Diabetes indicators 2-6. Active Diabetic patients, defined as all Active Clinical patients diagnosed with diabetes at least one year prior to the Report Period (Diabetes Denominator 2), AND at least 2 visits in the past year, AND 2 diabetes-related visits ever.

**Numerator:** Same as FY02. Patients in the denominator with a diagnosis of depressive disorders, defined as at least two visits with diagnosis 296.0-313.1 in the year prior to the end of the Report period.

**Logic Description:** Age is calculated at the beginning of the Report period. The numerator is defined as at least two visits with diagnosis (purpose of visit 296.0-313.1 recorded in V POV file) in the year prior to the end of the Report period.

**Patient List Description:** List of diabetic patients with date and code of recent depressive diagnosis, if any.

**Indicator Targets: TBD**

Figure 7-41: Sample Patient List, Indicator A

# 7.2.19 Indicator B: Colorectal Cancer Screening

**Developmental Indicator Description:** Increase the proportion of eligible AI/AN patients (ages 50 and older) who have had screening for Colorectal Cancer (CRC).

**Denominator 1:** All GPRA User Population patients ages 51 and older at beginning of the Report period.

**Denominator 2:** All Active Clinical patients ages 51 and older at beginning of the Report period.

**Numerator 1:** Patients who have had CRC screening, defined as any of the following: 1) a Fecal Occult Blood test or Rectal Exam in the two (2) years prior to the end of the Report period; 2) flexible sigmoidoscopy or double contrast barium enema in the last 5 years; or 3) colonoscopy in the last 10 years.

**Numerator 2** (subset of Numerator 1): Patients who have had either a Fecal Occult Blood test or Rectal Exam in the past two years.

**Logic Description:** Age is calculated at the beginning of the Report period. The difference between the age range 50 and older in the definition and 51 and older in the logic is because GPRA+ looks back 2 years for a test, i.e., when a patient who

was 51 at the beginning of the Report period would have been 49. GPRA+ identifies the tests and procedures described in the numerators above in the following order:

|                                       | CPT Codes  | ICD and Other Codes  | Taxonomy              |

| Colonoscopy                           | 45355, 45378-45380,<br>45382-45385, 45387  | V Procedure: 45.21, 45.22, 45.23, 45.25                    |                       |

**Patient List Definition:** List of patients ages 51 and older, with appropriate denominator indicated. Date and code of any test or procedure meeting the numerator definition, if any.

**Indicator Targets: TBD** 

#### **Performance Improvement Tips:**

1. Providers should ask about and record off-site historical tests (test type, date received and location) on PCC forms. Data entry mnemonics: *HBE* (barium enema); *HCOL* (colonoscopy); *HFOB* (Fecal Occult Blood); *HSIG* (sigmoidoscopy).

Figure 7-43: Sample Patient List, Indicator B

#### 7.2.20 Indicator C-1: Patient Education: Exercise and Diet

**Indicator Definition:** Increase the proportion of persons who are provided patient education on exercise and diet.

**Denominator 1:** All GPRA User Population patients ages 6 and older, broken down by gender.

**Denominator 2:** All Active Clinical patients ages 6 and older, broken down by gender and into the following age groups: 6-11, 12-19, 20-39, 40-59, 60 and older.

**Denominator 3:** Based on Denominator #3 from Diabetes indicators 2-6. Active Diabetic patients ages 6 and older, defined as all Active Clinical patients diagnosed with diabetes at least one year prior to the Report Period (Diabetes Denominator 2), AND at least 2 visits in the past year, AND 2 diabetes-related visits ever. Broken down by gender.

**Numerator 1**: All patients provided exercise education in the year prior to the end of the Report period.

**Numerator 2:** All patients provided diet and nutrition education in the year prior to the end of the Report period.

**Additional Report Features:** For Denominator 2, the pages following the indicator summary break the data down further for the following age groups: 6-11, 12-19, 20-39, 40-59, 60 and older.

**Logic Description:** Age is calculated at the beginning of the Report period.

GPRA+ uses the following IHS national patient education codes to define the numerators. If your facility has established its own code set, your codes will *not* be counted.

| Exercise | ending "-EX" (Exercise) ending "-LA" (Lifestyle Adaptation) containing "OBS-" (Obesity)   |
|----------|---|
| Diet     | ending "-N" (Nutrition) ending "-LA" (Lifestyle Adaptation) containing "OBS-" (Obesity) ending "-DT" (Diet) ( <b>Note:</b> "Diet" is a discontinued PFE code and is used only to identify patients for Baseline or Previous year time periods.) |

**Patient List Description:** A list of patients who received any patient education meeting the numerator definition, with the appropriate denominator identified. Displays the date the patient received the appropriate education and the PFE codes.

#### **Indicator Targets:**

Figure 7-46: Sample Patient List, Indicator C-1

#### 7.2.21 Indicator C-2: Patient Education: Medications

**Indicator Definition:** Increase the proportion of patients taking medications who are receiving patient education about their medications.

**Denominator 1:** All GPRA User Population patients with Medications dispensed at their facility during the year prior to the end of the Report period.

**Denominator 2:** All Active Clinical patients with Medications dispensed at their facility during the year prior to the end of the Report period.

**Numerator**: All patients in the denominator who were provided patient education about medications in any location.

**Logic Description:** Patients receiving medications are identified by any entry in the VMed file for your facility. GPRA+ uses the following patient education codes to define the numerators:

| Medication<br>Education | M-I (medication information) M-DI (Drug interaction) M-FU (Medication follow up) |
|-------------------------|--|
|                         | M-L (Medication patient information literature)                                  |
|                         | any PFE code containing "-M"   |

**Patient List Description:** A list of patients identified as receiving medications dispensed at their facilities, with the appropriate denominator identified. Displays the date the patient received any medication education and the codes.

# **Indicator Targets:**

Figure 7-48: Sample Patient List, Indicator C-2.

# 7.2.22 Indicator D: Cholesterol Screening

**Indicator Definition:** Increase the proportion of adults 18 through 65 who have had their blood cholesterol checked within the preceding 5 years. [Based on HP 2010 indicator 12.15.]

**Denominator 1:** All GPRA User Population patients ages 23 through 65, broken down by gender.

**Denominator 2:** All Active Clinical patients ages 23 through 65, broken down by gender.

**Numerator**: Any patient in the denominator with evidence of having any cholesterol screening at some time in the five years prior to the end of the Report period.

**Logic Description:** Age of the patient is calculated at the beginning of the Report period. The difference between the age range 18-65 in the definition and 23-65 in the logic is because GPRA+ looks back 5 years for a test, i.e., when a patient who was 23 at the beginning of the Report period would have been 18.

GPRA+ counts all Y instances reported, regardless of the results of the measurement. For this indicator, GPRA+ considers *any* of the tests below as meeting the numerator. The number in parentheses, e.g., (1), identifies the order in which the software looks for a test to meet the numerator.

| Test          | <b>CPT Codes</b> | ICD and    | LOINC | Taxonomy        |
|---------------|------------------|------------|-------|-----------------|
|               |                  | Other      | Codes |                 |

# 7.2.23 Indicator E-1: HIV Quality of Care

**NOTE:** This indicator will be included in version 2.1 of the GPRA+ FY03 software, available summer 2003

**Indicator Definition:** Increase the proportion of HIV-infected adolescents and adults who received testing consistent with current Public Health Service treatment guidelines. [Based on HP 2010 developmental indicator 13-13a Viral Load Testing.]

This indicator is currently being considered as a GPRA Indicator for FY 2005.

**Denominator 1:** All patients ages 13 and older with 2 visits within the service area (i.e., not Contract paid for) in the year prior to the end of the Report period with HIV POV diagnosis, including 1 HIV POV in last 6 months.

**Numerator 1**: Received CD4 test only (without PCR viral load) in the year prior to the end of the Report period.

**Numerator 2**: Received PCR viral load only (without CD4) in the year prior to the end of the Report period.

**Numerator 3**: Received both CD4 and PCR viral load tests in the year prior to the end of the Report period.

**Logic Description:** Age of the patient is calculated at the beginning of the Report period. GPRA+ uses the following codes and taxonomies to define the denominator and numerators.

|                | CPT Codes    | ICD and<br>Other Codes       | LOINC<br>Codes<br>(TBD) | Taxonomy    |
|----------------|--------------|------------------------------|-------------------------|-------------|
| HIV            |              | 042.0-044.9<br>V08<br>795.71 |                         |             |
| CD4            | 86361        |                              |                         | BGP CD4 TAX |
| PCR Viral Load | 87536, 87539 |                              |                         | BGP PCR TAX |

**Patient List Description:** For confidentiality reasons, no patient lists can be produced for this indicator.

#### **Indicator Targets: TBD**

| HP2010 target for viral load testing | developmental |
|--------------------------------------|---------------|
| HP2010 baseline for CD4 testing      | Nearly 100%   |

### 7.2.24 Indicator E-2: Prenatal HIV Testing and Education

**NOTE:** This indicator will be included in version 2.1 of the GPRA+ FY03 software, available summer 2003

**Indicator Definition:** Increase the proportion of pregnant women screened for HIV during prenatal health care visits. [Based on HP 2010 developmental indicator 25-17, screening for sexually transmitted diseases including HIV infection.]

This indicator is being considered as a GPRA indicator for FY 2005.

**Denominator 1:** All pregnant female patients ages 18-40, defined as at least two pregnancy-related visits during the year prior to the end of the Report period, one of which must be the first prenatal visit, and with no recorded HIV diagnosis in POV or problem list.

**Numerator 1**: Patients who received HIV test during the year prior to the end of the Report period, including refusals.

Numerator 1A: Number of documented refusals.

**Numerator 2:** Patients who were provided with patient education about HIV and testing.

**Logic Description:** Age of the patient is calculated at the beginning of the Report period. GPRA+ uses the following codes and taxonomies to define the denominator and numerators.

|                      | CPT Codes   | ICD and Other Codes   | LOINC<br>Codes<br>(TBD) | Taxonomy         |
|----------------------|---|---|-------------------------|------------------|
| Pregnancy            |   | POV V22.0-V23.9<br>640-648<br>651-676   |                         |                  |
| First prenatal visit |   | POV V22.0   |                         |                  |
| HIV diagnosis        |   | POV or problem list: 042.0-044.9<br>V08<br>795.71   |                         |                  |
| HIV test             | antibody: 86689,<br>86701-86703,<br>confirmatory test<br>86689<br>antigen 87390,<br>87391 |   |                         | BGP HIV TEST TAX |
| HIV Education        |   | Patient education codes:<br>containing "HIV-"<br>containing HIV<br>diagnosis 042.0-044.9,<br>V08, or 795.71 |                         |                  |

**Patient List Description:** A list of pregnant women ages 18 through 40 with no recorded HIV diagnosis who have NOT received an HIV test. .

# **Indicator Targets:**

| HP2010 target for indicator 25-17 has not been developed | Developmental indicator |

## 7.2.25 Indicator F: Domestic Violence Screening

**NOTE:** This indicator will be included in version 2.1 of the GPRA+ FY03 software, available summer 2003

**Indicator Definition:** Increase the proportion of female patients who receive screening annually for domestic violence.

**Proposed GPRA Indicator FY 2004:** 15% of eligible women patients between the ages of 18 and 40 are screened for domestic violence at direct care facilities.

**Denominator 1:** Female GPRA User Population patients ages 25 to 40 at beginning of Report period.

**Denominator 2:** Female Active Clinical patients ages 25 to 40 at beginning of Report period.

**Numerator 1**: Patients screened for domestic violence at any time in the year prior to the end of the Report period. Screening is broadly defined as either a domestic violence Health Factor or patient education code recorded.

**Numerator 1A**: Patients with recorded domestic violence Health Factors.

**Numerator 1B:** Patients who were provided with patient education about domestic violence.

**Logic Description:** Age of the patient is calculated at the beginning of the Report period. GPRA+ uses the following codes to define numerators.

| Domestic Violence Health   | DV + Current                                |
|----------------------------|---|
| Factors                    | DV + Past                                   |
|                            | DV – Current                                |
|                            | DV – Past                                   |
|                            | DV ? (patient denies but provider suspects) |
|                            | DV U (unable to screen)                     |
| DV Patient Education Codes | Containing "DV-"                            |

**Patient List Description:** A list of women ages 25 through 40 with appropriate denominator indicated who have NOT been screened using DV Health Factors.

**Indicator Targets:** No HP2010 indicator for Domestic Violence screening.

Figure 7-52: Sample Patient List, Indicator F

## 7.2.26 Indicator G: Alcohol Screening (FAS Prevention)

**NOTE:** This indicator will be included in version 2.1 of the GPRA+ FY03 software, available summer 2003

**Indicator Definition:** Increase alcohol screening in women of child-bearing age (as a surrogate for IHS GPRA indicator # 11 FAS Prevention "...prenatal clinics utilizing a recognized screening and case management protocol(s) for pregnant substance abusing women...").

**Proposed GPRA Indicator FY 2005:** Establish a baseline rate for alcohol use in a defined group of female patients of childbearing age (ages 18-40 TBD).

**Denominator 1:** Female GPRA User Population patients ages 18 to 40 at beginning of Report period.

**Denominator 2:** Female Active Clinical patients ages 18 to 40 at beginning of Report period.

**Numerator**: Patients who have received alcohol screen in the year prior to the end of the Report period, defined as Alcohol Health Factors.

**Documenting Alcohol Health Factors:** New Alcohol Health Factors are currently under development. Currently Health Factors are based on CAGE.

Use the CAGE questionnaire, which asks the following 4 questions:

- 1. Have you ever felt the need to **Cut down** on your drinking (or drug use)?
- 2. Have people **Annoyed** you by criticizing your drinking (drug use)?
- 3. Have you ever felt bad or **Guilty** about your drinking (drug use)?
- 4. Have you ever needed an **Eye opener** the first thing in the morning to steady your nerves or get rid of a hangover?

Based on how many YES answers were received, document Health Factor on PCC:

HF – CAGE 0/4 (all No answers)

HF – CAGE 1/4 (1 Yes answer)

HF - CAGE 2/4

HF - CAGE 3/4

HF – CAGE 4/4 (all Yes answers)

Optional values that can be documented on the PCC:

Level/Severity: Mild, Moderate, or Severe

Quantity: # of drinks daily

**Logic Description:** Age of the patient is calculated at the beginning of the Report period. GPRA+ uses the following codes to define numerators.

| Alcohol Health Factors | CAGE 0/4 |
|------------------------|----------|
|                        | CAGE 1/4 |
|                        | CAGE 2/4 |
|                        | CAGE 3/4 |
|                        | CAGE 4/4 |

**Patient List Description:** A list of women ages 18 through 40 with appropriate denominator indicated who have no alcohol Health Factor recorded.

**Indicator Targets:** TBD. No HP2010 indicator for Alcohol screening.

Figure 7-53: Sample Patient List, Indicator G

# 7.2.27 Indicator H: Tobacco Use/ Exposure to Second Hand Smoke

**GPRA FY03 Indicator.** Tobacco Control: By the end of 2003, the IHS and its stakeholders will develop a five-year plan for tobacco control in AI/AN communities.

**GPRA+ Indicator Definition:** Increase annual screening for tobacco use, as a surrogate marker for reducing Area age-specific prevalence rates for smoking and for environmental exposure to tobacco in the home.

Tobacco Use and Exposure to Environmental Tobacco Smoke is listed in GPRA+ as a developmental indicator because the formal GPRA indicator is not currently reporting on tobacco use rates. It is anticipated that in future years the GPRA indicator will include measures of tobacco cessation counseling as well as tracking patients who have quit using tobacco.

**Denominator 1:** All GPRA User Population patients ages 5 and older.

**Denominator 2:** All Active Clinical patients ages 5 and older.

**Denominator 3:** Pregnant women ages 18-49 at beginning of Report period, defined as at least two visits with pregnancy POV or Problem diagnosis during the year prior to the end of the Report period,.

**Numerator 1:** Patients who have been screened for tobacco use with any Tobacco Health Factor in the year prior to the end of the Report period.

**Numerator 2:** Patients identified as current tobacco users with either Health Factors or diagnosis, both smokers and smokeless users.

**Numerator 3 (subset of Numerator 2):** Patients identified as current smokers with either Health Factors or diagnosis in the past year.

**Numerator 4 (subset of Numerator 2):** Patients identified as current smokeless tobacco users with either Health Factors or diagnosis in the past year.

**Numerator 5:** Patients identified as tobacco users (Numerator 2) who have received tobacco cessation counseling in the past year, using clinic and patient education codes.

**Numerator 6:** Patients identified as exposed to environmental tobacco smoke (ETS) (second hand smoke) with either Health Factors or diagnosis in the past year.

**Additional Report Features:** Report breaks each denominator down by gender. Each denominator is additionally reported by gender and age breakdowns: ages 5-13; 14-17; 18-24; 25-44; 45-64; and 65 and older, based on HP 2010 age groups.

**Logic Description:** Age is calculated at the beginning of the Report period. GPRA+ uses the following codes to identify members of Denominator 3.

|           | CPT Codes | ICD and Other Codes                   |
|-----------|-----------|---------------------------------------|
| Pregnancy |           | V22.0-V23.9, 640.*-648.*, 651.*-676.* |

For numerator definitions, all existing national Tobacco Health Factors are listed below with the numerator they apply to.

| Health Factor              |                       |
|----------------------------|-----------------------|
| CESSATION-SMOKELESS        | Numerator 1           |
| CESSATION-SMOKER           | Numerator 1           |
| CURRENT SMOKELESS          | Numerators 1,2, 4     |
| CURRENT SMOKER             | Numerators 1, 2, 3    |
| NON-TOBACCO USER           | Numerator 1           |
| PREVIOUS SMOKELESS         | Numerator 1           |
| PREVIOUS SMOKER            | Numerator 1           |
| SMOKE FREE HOME            | Numerator 1           |
| SMOKER IN HOME             | Numerator 1, 6        |
| CURRENT SMOKER & SMOKELESS | Numerators 1, 2, 3, 4 |
| EXPOSURE TO ENVIRONMENTAL  | Numerator 1, 6        |
| TOBACCO SMOKE              |                       |

GPRA+ also uses the following definitions for identifying the numerators:

| Current Smokers (Numerators 2, 3)          | Diagnosis 305.1* or V15.82   |
|--|--|
| Tobacco Cessation Counseling (Numerator 5) | Clinic code 94 Patient Education codes: TO-QU (tobacco quit), TO-LA (tobacco lifestyle adaptation) Dental code 1320 – tobacco counseling |

**Patient List Definition:** List of patients with any Tobacco Health Factor or tobaccorelated diagnosis in past year.

**Indicator Targets: TBD** 

| IHS 2003 target for screening      | TBD  |
|------------------------------------|------|
| IHS 2010 target for annual tobacco | 100% |
| screening                          |      |

Figure 7-56: Sample Patient List, Indicator H.

#### 7.2.28 Indicator I: Asthma

**NOTE:** This indicator will be included in version 2.1 of the GPRA+ FY03 software, available summer 2003

**Indicator Definition:** Reduce hospitalizations for asthma. [Based on HP 2010 indicator 24-2.]

**Denominator 1:** All GPRA User Population patients, broken down into three age groups: under 5; 5 to 64; and 65 and older.

**Denominator 2:** All Active Clinical patients, broken down into three age groups: under 5; 5 to 64; and 65 and older.

**Numerator 1:** Patients who have been diagnosed with asthma ever and have had two asthma-related visits in the year prior to the end of the Report period (POV codes 493.\*).

**Numerator 2:** Patients who have been hospitalized at any hospital for asthma in the year prior to the end of the Report period (Admission diagnosis 493.\*).

**Logic Description:** Age of the patient is calculated at the beginning of the Report period. GPRA+ uses ICD codes 493.\* in the Purpose of Visit (POV), problem list or admission files to determine Asthma diagnosis.

**Patient List Description:** Numerators only. A list of patients who meet the Asthma diagnosis criteria in the numerators, with their appropriate denominator identified. Displays the date of the asthma diagnosis, with code; additionally displays the date of hospital admission with asthma diagnosis, designated as "H."

### **Indicator Targets:**

| HP1998 baseline for hospitalizations for |                 |
|--|-----------------|
| asthma:                                  |                 |
| Under 5                                  | 45.6 per 10,000 |
| 5-64                                     | 12.5 per 10,000 |
| 65 and older                             | 17.7 per 10,000 |
| HP2010 target for hospitalizations for   |                 |

Figure 7-57:Sample Patient List, Indicator I..

# 7.2.29 Indicator J-1: Cardiovascular Disease: Lipids Assessment

**NOTE:** This indicator will be included in version 2.1 of the GPRA+ FY03 software, available summer 2003

**Indicator Description:** Increase the proportion of patients with ischemic heart disease who had a lipids assessment and whose LDL result was good. [Based on HP 2010 developmental indicator 12-16 Increase the proportion of persons with coronary heart disease who have their LDL-cholesterol level treated to a goal of less than or equal to 100.]

**Denominator:** All patients diagnosed with cardiac disease, defined as at least two visits any time in the year prior to the end of the Report period with diagnosis of ischemic heart disease (410.0-412.\* or 414.0-414.9). Broken down by gender.

**Numerator 1:** Patients who have had *either* a LIPID PROFILE *or* an LDL, an HDL and Triglyceride (TG) (all three).

**Numerator 2:** Patients with LDL less than or equal to (<=) 100.

**Numerator 3:** Patients with LDL between 101-130.

**Numerator 4:** Patients with LDL between 131-160.

**Numerator 5:** Patients with LDL greater than (>) 160.

**Logic Description:** Patients are defined for the denominator as at least two visits any time in the year prior to the end of the Report period with diagnosis of ischemic heart disease (Purpose of Visit 410.0-412.\* or 414.0-414.9 recorded in the V POV file).

For each numerator, counts all Y instances reported, regardless of the results of the measurement. For each of the tests described in the numerator, GPRA+ searches for the last test done in the year prior to the end of the Report period.

| GPRA+   | uses the | follo | wing      | to       | define  | the | tests: |

Figure 7-58: Sample Patient List, Indicator J-1.

## 7.2.30 Indicator J-2: Cardiovascular Disease: Hypertension

**NOTE:** This indicator will be included in version 2.1 of the GPRA+ FY03 software, available summer 2003

**Indicator Description:** Increase the proportion of patients with ischemic heart disease who had optimal or controlled blood pressure.

**Denominator:** All patients diagnosed with cardiac disease, defined as at least two visits any time in the year prior to the end of the Report period with diagnosis of ischemic heart disease (410.0-412.\* or 414.0-414.9). Broken down by gender.

**Numerator 1:** Patients with **optimal** Blood Pressure (BP), defined as the mean systolic value is less than or equal to (<=) 130 AND the mean diastolic value is less than or equal to (<=) 80.

**Numerator 2:** Patients with **controlled** Blood Pressure (BP), defined as the mean systolic value is greater than (>) 130 and less than or equal to (<=) 139 AND the mean diastolic value is greater than (>) 80 and less than or equal to (<=) 90.

**Numerator 3:** Patients with **uncontrolled** Blood Pressure (BP), defined as the mean systolic value is greater than (>) 139 and less than or equal to (<=) 159 AND the mean diastolic value is greater than (>) 90 and less than or equal to (<=) 100.

**Numerator 4:** Patients with **severe uncontrolled** Blood Pressure (BP), defined as the mean systolic value is greater than (>) 159 AND the mean diastolic value is greater than (>) 100.

**Numerator 5:** Patients with **undetermined** BP, defined as patients with less than 2 blood pressures documented at non-ER visits in the year prior to the end of the Report period.

**Logic Description:** Patients are defined for the denominator as at least two visits any time in the year prior to the end of the Report period with diagnosis of ischemic heart disease (Purpose of Visit 410.0-412.\* or 414.0-414.9 recorded in the V POV file).

For each of the numerators, GPRA+ uses the last 2 Blood Pressures documented on non-ER visits in the year prior to the end of the Report period. The mean Systolic value is calculated by adding the last 2 systolic values and dividing by 2. The mean Diastolic value is calculated by adding the diastolic values from the last 2 blood pressures and dividing by 2. If the systolic and diastolic values do not BOTH meet one of the four categories listed above, then the value that is *least* controlled determines the category.

**Patient List Description:** List of Patients diagnosed with ischemic heart disease. Displays the mean blood pressure value, if any, and designates OPT for Optimal (Numerator 1), CON for Controlled (Numerator 2), UNC for Uncontrolled (Numerator 3), and SUNC for Severe Uncontrolled (Numerator 4).

### **Indicator Targets: TBD**

Figure 7-59: Sample Patient List, Indicator J-2.

### 7.2.31 Indicator J-3: Cardiovascular Disease: Tobacco Use Rates

**NOTE:** This indicator will be included in version 2.1 of the GPRA+ FY03 software, available summer 2003

**Indicator Description:** Increase the proportion of patients with ischemic heart disease who were screened for tobacco use and received patient education on tobacco cessation.

**Denominator:** All patients diagnosed with cardiac disease, defined as at least two visits any time in the year prior to the end of the Report period with diagnosis of ischemic heart disease (410.0-412.\* or 414.0-414.9). Broken down by gender.

**Numerator 1:** Patients who have been screened for tobacco use in year prior to the end of the Report period, using Health Factors or tobacco-related diagnosis.

**Numerator 2:** Patients identified as tobacco users, using Health Factors or tobacco-related diagnosis.

**Numerator 3:** Patients counseled on tobacco cessation, identified by patient education codes.

**Numerator 4:** Patients in tobacco cessation programs, defined as clinic code 94.

**Numerator 5:** Number of people who have quit, identified by Health Factors.

**Logic Description:** Patients are defined for the denominator as at least two visits any time in the year prior to the end of the Report period with diagnosis of ischemic heart disease (Purpose of Visit 410.0-412.\* or 414.0-414.9 recorded in the V POV file).

For numerator definitions, all existing national Tobacco Health Factors are listed below with the numerator they apply to.

| Health Factor              |                  |
|----------------------------|------------------|
| CESSATION-SMOKELESS        | Numerators 1, 5  |
| CESSATION-SMOKER           | Numerators 1, 5  |
| CURRENT SMOKELESS          | Numerators 1,2,  |
| CURRENT SMOKER             | Numerators 1, 2, |
| NON-TOBACCO USER           | Numerator 1      |
| PREVIOUS SMOKELESS         | Numerators 1, 5  |
| PREVIOUS SMOKER            | Numerators 1, 5  |
| SMOKE FREE HOME            | Numerator 1      |
| SMOKER IN HOME             | Numerator 1      |
| CURRENT SMOKER & SMOKELESS | Numerators 1, 2, |
| EXPOSURE TO ENVIRONMENTAL  | Numerator 1      |
| TOBACCO SMOKE              |                  |

GPRA+ also uses the following definitions for identifying the numerators:

| Current Smokers (Numerator 2)              | Diagnosis 305.1* or V15.82   |
|--|--|
| Tobacco Cessation Counseling (Numerator 3) | Patient Education codes: TO-QU (tobacco quit), TO-LA (tobacco lifestyle adaptation) Dental Code D1320 – tobacco counseling |
| Tobacco Cessation Program (Numerator 4)    | Clinic code 94   |

**Patient List Definition:** List of patients diagnosed with ischemic heart disease with any Tobacco Health Factor or tobacco-related diagnosis in past year.

**Indicator Targets: TBD** 

| IHS 2003 target for screening      | TBD  |
|------------------------------------|------|
| IHS 2010 target for annual tobacco | 100% |
| screening                          |      |

Figure 7-60: Sample Patient List, Indicator J-3.

### 7.2.32 Indicator J-4: Cardiovascular Disease: Obesity

**NOTE:** This indicator will be included in version 2.1 of the GPRA+ FY03 software, available summer 2003

**Indicator Description:** Increase the proportion of patients with ischemic heart disease whose BMI can be measured and decrease proportion of patients who are overweight.

**Denominator:** All patients diagnosed with cardiac disease, defined as at least two visits any time in the year prior to the end of the Report period with diagnosis of ischemic heart disease (410.0-412.\* or 414.0-414.9). Broken down by gender.

**Numerator 1:** Patients for whom a BMI could be calculated.

**Numerator 2**: For those with a BMI calculated, those considered overweight but not obese using BMI and standard BMI tables.

**Numerator 3:** For those with a BMI calculated, those considered obese using BMI and standard BMI tables.

**Numerator 4:** Total of Numerators 2 and 3, all overweight patients.

**Logic Description:** GPRA+ calculates BMI at the time the report is run, using NHANES II. For 18 and under, a height and weight must be taken on the same day any time in the year prior to the end of the Report period. For 19 through 50, BMI within last five years. For over 50, BMI within last two years.

Overweight but not obese is defined as BMI of 25 through 29 for adults 19 and older; for ages 2-18, based on standard tables.

Obese is defined as BMI of 30 or more for adults 19 and older; for ages 2-18, based on standard tables.

**Patient List Description:** List of patients diagnosed with ischemic heart disease with BMI, if available.

| List of Patients diagnosed w/ CVD, w/ BMI, if available |       |           |    |     |     |       |    |

Figure 7-61: Sample Patient List, Indicator J-4

### 7.2.33 Indicator J-5: Cardiovascular Disease: Exercise Education

**NOTE:** This indicator will be included in version 2.1 of the GPRA+ FY03 software, available summer 2003

**Indicator Description:** Increase the proportion of patients with ischemic heart disease who are receiving patient education about the benefits of exercise.

**Denominator:** All patients diagnosed with cardiac disease, defined as at least two visits any time in the year prior to the end of the Report period with diagnosis of ischemic heart disease (410.0-412.\* or 414.0-414.9). Broken down by gender.

**Numerator:** Patients who are provided patient education about exercise during the year prior to the end of the Report period.

**Logic Description:** GPRA+ uses the following patient education codes to define the numerator.

| Exercise | ending "-EX" (Exercise)             |
|----------|-------------------------------------|
|          | ending "-LA" (Lifestyle Adaptation) |
|          | containing "OBS-" (Obesity)         |

**Patient List Description:** List of patients diagnosed with ischemic heart disease and date that exercise education was provided with code, if any.

### 7.2.34 Indicator J-6: Cardiovascular Disease and Mental Health

**NOTE:** This indicator will be included in version 2 of the GPRA+ FY03 software, to be available summery 2003.

**Indicator Description:** Identify the proportion of patients with ischemic heart disease who are diagnosed with depression or anxiety.

**Denominator:** All patients diagnosed with cardiac disease, defined as at least two visits any time in the year prior to the end of the Report period with diagnosis of ischemic heart disease (410.0-412.\* or 414.0-414.9). Broken down by gender.

**Numerator:** Patients in the denominator with a diagnosis of depressive disorders, defined as at least two visits with diagnosis 296.0-313.1 in the year prior to the end of the Report period.

**Logic Description:** The numerator is defined as at least two visits with diagnosis of depressive disorders (purpose of visit 296.0-313.1 recorded in V POV file) in the year prior to the end of the Report period.

**Patient List Description:** List of patients diagnosed with ischemic heart disease with date and code of recent depressive diagnosis, if any.
